

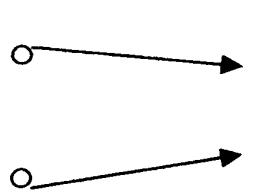

Fig. 1

The element which has double the  
Atomic number of the precious  
element (ex: gold) or (At. Nb.\*2 +1,  
or +2 or -1)  
bombarded by neutrons and protons  
to give a split into the precious  
element which is gold in this case.

neutrons

And protons that bombard the nucleus

Of the element that has (At.nb. = At. Nb. Of gold\*2 or At. Nb.\*2+1 or +2 or -1)

And generating a chain reaction, and a split into gold.
